

ROOMLINK

Super Admin Product Requirements Document (PRD)

Digital Intercom & Guest Service Platform for Hotels

Version: 1.0 (Founder Draft)

Prepared by: Tanmay Kumar Sahoo

CONFIDENTIAL

This document contains proprietary and confidential information belonging to RoomLink. It is intended for internal product planning, development, and investor discussions only.

Product Vision

The Super Admin Portal is the command center of the entire RoomLink platform. The entrepreneur creates hotel workspaces, assigns subscription plans, invites Hotel Admins, monitors onboarding, manages billing, provides remote support, and analyzes platform-wide business performance. Hotels configure their own operations inside their Hotel Admin workspace, allowing RoomLink to scale to thousands of hotels with a small central team.

Core Principle

Super Admin manages hotels; Hotel Admin manages hotel operations.

Super Admin (RoomLink HQ)	Hotel Admin (Inside Hotel)
Create hotel workspace	Add rooms
Assign subscription plan	Generate QR codes
Invite Hotel Admin	Create staff accounts
Monitor onboarding	Upload restaurant menu
Manage billing	Configure services
Provide remote support	Operate daily hotel workflows

Global Navigation

- Dashboard
- Hotels
- Subscriptions
- Users
- Onboarding
- Support
- Analytics
- Billing
- Integrations
- Settings
- Audit Logs

Epic 1: Dashboard

User Story: As a Super Admin, I want a real-time business overview so that I can understand the health of the RoomLink platform immediately.

KPI Cards

- Total Hotels
- Active Hotels
- Hotels in Trial
- Hotels Onboarding
- Total Rooms
- Monthly Recurring Revenue (MRR)
- Annual Recurring Revenue (ARR)
- Active Hotel Admins
- Open Support Tickets
- Failed Payments

Charts

- Hotels added this month
- Revenue growth
- Daily active hotels
- Activation funnel
- Requests processed platform-wide

Alerts

- Trial ending in 7 days
- Subscription expiring
- Onboarding stalled for more than 48 hours
- Failed payment detected
- Support SLA breach

Epic 2: Hotel Management

User Story: As a Super Admin, I want to create a new hotel workspace so that a newly signed hotel can begin onboarding immediately.

Hotel Creation Wizard

- Step 1: Basic Information
- Step 2: Contact Details
- Step 3: Subscription Plan
- Step 4: Create Hotel Admin
- Step 5: Review & Create

Fields

- Hotel name
- Hotel code
- Brand
- City
- State
- Country
- Address
- Contact person
- Phone
- Email
- Time zone
- Check-in time
- Check-out time

Automatic Actions

- Create isolated hotel workspace
- Create Hotel Admin account
- Send invitation email
- Initialize onboarding tracker
- Create audit log entry
- Allocate room quota based on plan

Epic 3: Hotels List

The Hotels List screen is the operational center for all customer accounts.

Hotel	City	Rooms	Plan	Status
Royal Inn	Bhubaneswar	60	Professional	Active
Sea View Resort	Puri	45	Starter	Trial
Urban Suites	Cuttack	80	Enterprise	Onboarding

Actions

- View hotel
- Edit
- Suspend
- Delete
- Impersonate Hotel Admin
- Send onboarding reminder

Epic 4: Subscription Management

User Story: As a Super Admin, I want to manage hotel subscriptions so that I can control billing and revenue.

Plans

- Starter
- Professional
- Enterprise
- Custom

Actions

- Assign plan
- Upgrade
- Downgrade
- Extend trial
- Pause subscription
- Resume subscription
- Cancel subscription
- Enable/disable auto-renew
- Generate invoice
- View payment history

Epic 5: Hotel Admin Management

User Story: As a Super Admin, I want to invite and manage Hotel Admin users so that each hotel can configure its own property.

Actions

- Create Hotel Admin
- Edit details
- Disable account
- Reset password
- Resend invitation
- Change email
- Change mobile number

Epic 6: Onboarding Tracker

User Story: As a Super Admin, I want to see exactly where each hotel is stuck during setup.

Step	Status
Hotel Profile	Complete
Departments	Complete
Rooms	In Progress
QR Generation	Pending
Staff Setup	Pending
Restaurant Menu	Pending
Services	Pending
Testing	Pending
Go Live	Pending

Displayed

- Onboarding percentage
- Current step
- Last activity timestamp
- Days since last activity
- Assigned implementation owner

Epic 7: Hotel Detail View

Opening a hotel provides a complete operational and commercial view.

Tabs

- Overview
- Subscription
- Users
- Rooms
- Activity
- Support
- Billing
- Audit Log

Overview

- Hotel logo
- Address
- Contact
- Room count
- Departments
- Current plan
- Onboarding percentage
- Last login

Activity Feed

- Hotel created
- Admin invited
- Rooms imported
- QR downloaded
- Staff added
- First guest connected
- Subscription changed

Epic 8: Impersonation

User Story: As a Super Admin, I want to temporarily enter a hotel workspace so that I can troubleshoot issues without requesting passwords.

Workflow

- Open hotel
- Click Impersonate
- Temporary session begins
- Perform troubleshooting
- Exit session

Rules

- Time-limited session
- Fully audited
- Hotel optionally notified
- No password sharing

Epic 9: Support Center

User Story: As a Super Admin, I want a centralized support system for all hotels.

Ticket Categories

- Login
- QR Code
- Room Setup
- Menu Upload
- Staff Permissions
- Notifications
- Voice Calling
- Billing
- PMS Integration
- General

Workflow

- Open
- Assigned
- In Progress
- Waiting for Hotel
- Resolved
- Closed

Epic 10: Platform Analytics

User Story: As a Super Admin, I want platform-wide analytics so that I can make business decisions.

Business Metrics

- MRR
- ARR
- Churn rate
- Activation rate
- Trial conversion rate
- Average onboarding time

Operational Metrics

- Total chats
- Voice calls
- Food orders
- Housekeeping requests
- Maintenance tickets
- Active users
- Peak usage

Geographic Analytics

- Hotels by city
- Hotels by state
- Hotels by country

Epic 11: Billing

User Story: As a Super Admin, I want to manage invoices and payments so that subscriptions remain active.

Actions

- Generate invoice
- Send invoice
- Mark paid
- Retry payment
- Apply credit
- Process refund
- Export billing report

Epic 12: Integrations

User Story: As a Super Admin, I want to configure global integrations once so that hotels can connect external systems.

PMS

- Oracle OPERA
- IDS Next
- eZee
- Hotelogix

Payments

- Razorpay
- Stripe

Communication

- WhatsApp
- Twilio
- Email
- SMS

Epic 13: Audit Logs

User Story: As a Super Admin, I want every critical action recorded for security and compliance.

Logged Actions

- Hotel created
- Hotel deleted
- Subscription changed
- User invited
- Password reset
- QR regenerated
- Impersonation started
- Impersonation ended
- Billing modified
- Integration changed

MVP Scope

Included

- Dashboard
- Hotel creation
- Hotel list
- Subscription management
- Hotel Admin invitation
- Onboarding tracker
- Impersonation
- Support tickets
- Basic analytics
- Billing overview
- Audit logs

Excluded

- Advanced forecasting
- Multi-currency accounting
- White-label branding
- Partner reseller portal
- AI support assistant

Success Metrics

- Hotel onboarding completion rate
- Time to activate hotel
- Trial-to-paid conversion
- Monthly recurring revenue
- Churn rate
- Support resolution time
- Active hotels
- Revenue per hotel
- Customer lifetime value
